UNIVERSITY EXTENSION LECTURES

For the convenience of organizations within the State who are interested in obtaining speakers from the faculty of the University of Illinois or from members of its research or administrative staff, this bulletin of information has been prepared by the Speech Aids Service of the Division of University Extension.

These members of the University staff are willing to make a reasonable number of appearances before organizations and clubs of the State insofar as such engagements do not interfere with the discharge of the regular duties for which they are employed. When seeking the services of a speaker from the University, one ought to observe the following conditions:

(1) The speaker ought to be given assurance of an audience that would justify the expenditure of his time and energy.

(2) Those in charge should plan the program so as to give the speaker sufficient time for his address.

(3) The University can pay expenses of staff members only when they are travelling on official business for the University. Frequently when staff members accept speaking engagements, they must work overtime to make up for their absence. Consequently it has been the practice of organizations securing University speakers to pay them a reasonable honorarium over and above travelling expenses, the amount of the honorarium de-

pending upon the time consumed by the speaker in preparing and giving the lecture and the amount of travel necessitated by the engagement.

(4) Organizations are advised to *write* to the staff member they desire as a speaker and to make all arrangements directly with him. The Speech Aids Service will be glad to be of assistance but cannot accept engagements for staff members. All speakers listed in this bulletin may be addressed at the University of Illinois, Urbana, Illinois.

UNIVERSITY EXTENSION LECTURES

For the convenience of organizations within the State who are interested in obtaining speakers from the faculty of the University of Illinois or from members of its research or administrative staff, this bulletin of information has been prepared by the Division of University Extension.

These members of the University staff are willing to make a reasonable number of appearances before organizations and clubs of the State, insofar as such engagements do not interfere with the discharge of the regular duties for which they are employed. It should be borne in mind, however, that such engagements do impose an extra burden upon the members of the staff. Frequently, it may be necessary that they must work overtime to make up for their absences.

As a consequence, organizations seeking the services of a speaker from the University of Illinois should observe the following conditions:

(1) The speaker ought to be given assurance of an audience that would justify the expenditure of his time and energy.

(2) Arrangements should be completed far enough in advance of the speaking date to give adequate time for preparation. Those in charge should arrange the program so as to give the speaker sufficient time for his address.

(3) The University can pay expenses of staff members only when they are travelling on official business for the University. Consequently, it has been the practice of organizations securing University speakers to pay them a reasonable honorarium, the amount of the honorarium depending upon the time consumed by the speaker in preparing and giving the lecture and the amount of travel necessitated by the engagement.

(4) Organizations are advised to *write* to the staff member they desire as a speaker and to make all arrangements directly with him. The Division of University Extension will be glad to be of assistance but cannot accept engagements for staff members. All speakers listed in this bulletin may be addressed at the University of Illinois, Urbana, Illinois.

UNIVERSITY EXTENSION LECTURES

This bulletin, prepared by the Division of University Extension, is for the convenience of organizations in the State which are interested in obtaining speakers from the faculty of the University of Illinois, or from members of its research or administrative staff. All speakers listed have expressed a willingness to lecture on the topics given.

Arrangements should be made directly with the speaker concerned. Fees, dates, and exact topics can be most efficiently determined in this manner. All speakers listed may be addressed at the University of Illinois, Urbana, Illinois.

Because the University can pay expenses of staff members only when they are traveling on official business, and because their absence may have to be made up in overtime work, the following should be observed:

(1) The speaker should be given assurance of an audience which would justify the expenditure of his time and energy.

(2) Arrangements should be completed enough in advance to give the speaker adequate time for preparation and adaptation best suited to the needs and interests of the organization. The program should allow sufficient time for his address.

(3) Provision should be made for payment of a reasonable honorarium, the amount depending on the time spent in preparing and giving the lecture, the travel necessitated, and the actual expenses incurred.

If an organization desires a staff member to speak specifically about the University itself — its accomplishments, its problems, and its needs — rather than topics of the character listed, the Division will be glad to suggest a competent speaker.

Inquiries of a general nature relative to off-campus lectures may be addressed to the Division of University Extension, but it can not accept engagements for staff members.

SPEAKERS AND LECTURERS

Throughout the bulletin, speakers are listed alphabetically without regard to classification as to the general field or fields in which they are prepared to speak. The classified index on page 37, however, will furnish a guide to the various subject matter fields and the speakers within those fields. In several cases, no specific titles are listed for speakers. In such instances, organizations desiring talks in the fields indicated by the academic titles of the speakers should enter into correspondence with them as to the setting of an exact topic.

UNIVERSITY EXTENSION LECTURERS

THIS BULLETIN, prepared by the Division of University Extension, is for the convenience of organizations in the state which are interested in obtaining speakers from the faculty of the University of Illinois or from members of its research or administrative staff. All speakers listed have expressed a willingness to lecture on the topics given.

Arrangements should be made directly with the speaker concerned. Fees, dates, and exact topics can be most efficiently determined in this manner. All speakers listed may be addressed at the University of Illinois, Urbana, Illinois.

Because the University can pay expenses of staff members only when they are traveling on official business, and because their absence may have to be made up in overtime work, the following should be observed:

(1) The speaker should be given assurance of an audience which would justify the expenditure of his time and energy.

(2) Arrangements should be completed far enough in advance to give the speaker adequate time for preparation and adaptation best suited to the needs and interests of the organization. The program should allow sufficient time for his address.

(3) Provision should be made for payment of a reasonable honorarium, the amount depending on the time spent in preparing and giving the lecture, the travel necessitated, and the actual expenses incurred.

If an organization desires a staff member to speak specifically about the University itself — its accomplishments, its problems, and its needs — rather than topics of the character listed, the Division will be glad to suggest a competent speaker.

Inquiries of a general nature relative to off-campus lectures may be addressed to the Division of University Extension, but it can not accept engagements for staff members.

SPEAKERS AND LECTURERS

Throughout the bulletin, speakers are listed alphabetically without regard to the classification as to the general field or fields in which they are prepared to speak. The classified index on page 49, however, will furnish a guide to the various subject matter fields and the speakers in those fields. In several cases, no specific titles are listed for speakers. In such instances, organizations desiring talks in the fields indicated by the academic titles of the speakers should enter into correspondence with them as to the setting of an exact topic.

UNIVERSITY EXTENSION LECTURERS

THIS BULLETIN, prepared by the Division of University Extension, is for the convenience of organizations in the state which are interested in obtaining speakers from the faculty of the University of Illinois or from members of its research or administrative staff. All speakers listed have expressed a willingness to lecture on the topics given.

Arrangements should be made directly with the speaker concerned. Fees, dates, and exact topics can be most efficiently determined in this manner. All speakers listed may be addressed at the University of Illinois, Urbana, Illinois.

Because the University can pay expenses of staff members only when they are traveling on official business, and because their absence may have to be made up in overtime work, the following should be observed:

(1) The speaker should be given assurance of an audience which would justify the expenditure of his time and energy.

(2) Arrangements should be completed far enough in advance to give the speaker adequate time for preparation and adaptation best suited to the needs and interests of the organization. The program should allow sufficient time for his address.

(3) Provision should be made for payment of a reasonable honorarium, the amount depending on the time spent in preparing and giving the lecture, the travel necessitated, and the actual expenses incurred.

If an organization desires a staff member to speak specifically about the University itself — its accomplishments, its problems, and its needs — rather than topics of the character listed, the Division will be glad to suggest a competent speaker.

Inquiries of a general nature relative to off-campus lectures may be addressed to the Division of University Extension, but it can not accept engagements for staff members.

SPEAKERS AND LECTURERS

Throughout the bulletin, speakers are listed alphabetically without regard to the classification as to the general field or fields in which they are prepared to speak.

UNIVERSITY EXTENSION LECTURERS

THIS BULLETIN, prepared by the Division of University Extension, is for the convenience of organizations in the state which are interested in obtaining speakers from the faculty of the University of Illinois or from members of its research or administrative staff. All speakers listed have expressed a willingness to lecture on the topics given.

Arrangements should be made directly with the speaker concerned. Fees, dates, and exact topics can be most efficiently determined in this manner. All speakers listed may be addressed at the University of Illinois, Urbana, Illinois.

Because the University can pay expenses of staff members only when they are traveling on official business, and because their absence may have to be made up in overtime work, the following should be observed:

(1) The speaker should be given assurance of an audience which would justify the expenditure of his time and energy.

(2) Arrangements should be completed far enough in advance to give the speaker adequate time for preparation and adaptation best suited to the needs and interests of the organization. The program should allow sufficient time for his address.

(3) Provision should be made for payment of a reasonable honorarium, the amount depending on the time spent in preparing and giving the lecture, the travel necessitated, and the actual expenses incurred.

If an organization desires a staff member to speak specifically about the University itself — its accomplishments, its problems, and its needs — rather than topics of the character listed, the Division will be glad to suggest a competent speaker.

Inquiries of a general nature relative to off-campus lectures may be addressed to the Division of University Extension, but it can not accept engagements for staff members.

SPEAKERS AND LECTURERS

Throughout the bulletin, speakers are listed alphabetically without regard to the classification as to the general field or fields in which they are prepared to speak.

SPEAKERS BULLETIN

This bulletin lists members of the University staff who have expressed a willingness to accept a limited number of off-campus speaking engagements.

Further information in the form of supplementary data sheets carrying brief biographical sketch may be obtained by writing to the Speakers Bureau of the Division of University Extension.

All negotiations as to availability on given dates, fees, and exact topics should be conducted directly with the individual concerned. Experience demonstrates that this cannot be done effectively through an intermediary.

Because the University can pay expenses of staff members only when they are traveling on official business, and because their absence may have to be made up in overtime work, the following should be observed:

1. The speaker should be given assurance of an audience which would justify the expenditure of his time and energy.

2. Arrangements should be completed far enough in advance to give the speaker adequate time for preparation and adaptation best suited to the needs and interests of the organization. The program should allow sufficient time for his address.

3. Provision should be made for payment of a reasonable honorarium, the amount depending on the time spent in preparing and giving the lecture, the travel necessitated, and the actual expenses incurred.

If an organization desires a staff member to speak specifically about the University itself--its accomplishments, its problems, and its needs--rather than topics of character listed, the Division will be glad to suggest a competent speaker.

Inquiries of a general nature relative to off-campus lectures may be addressed to the Division of University Extension, but it cannot accept engagements for staff members.

SPEAKERS BULLETIN

This bulletin lists members of the University staff who have expressed a willingness to accept a limited number of off-campus speaking engagements.

Further information in the form of supplementary data sheets carrying brief biographical sketch may be obtained by writing to the Speakers Bureau of the Division of University Extension.

Negotiations as to the availability of a speaker on given dates; fees; and exact topics may be conducted through the Speakers Bureau or directly with the individual involved. If they are conducted through the Speakers Bureau, complete information should be furnished the Bureau regarding first choice and alternate dates; preferred topics, and the range of rates that the organization is prepared to pay.

Because the University can pay expenses of staff members only when they are traveling on official business, and because their absence may have to be made up in overtime work, the following should be observed:

1. The speaker should be given assurance of an audience which would justify the expenditure of his time and energy.

2. Arrangements should be completed far enough in advance to give the speaker adequate time for preparation and adaptation best suited to the needs and interests of the organization. The program should allow sufficient time for his address.

3. Provision should be made for payment of a reasonable honorarium, the amount depending on the time spent in preparing and giving the lecture, the travel necessitated, and the actual expenses incurred.

If an organization desires a staff member to speak specificaly about the University itself--its accomplishments, its problems, and its needs--rather than topics of character listed, the Division will be glad to suggest a competent speaker.
